

Jeweled Crown

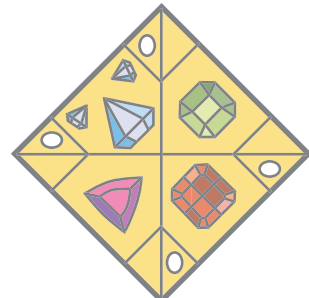

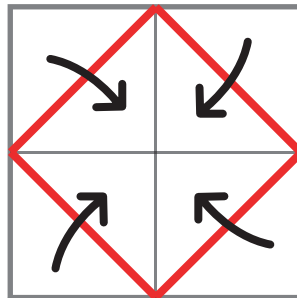

Instructions:

1. Print out the template and cut out the yellow square on the thick black lines.

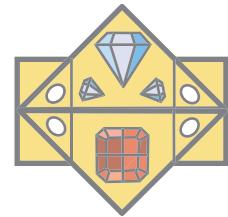

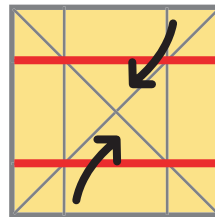

2. Begin by folding and unfolding the square in half each way.

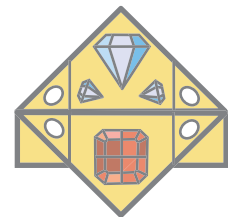

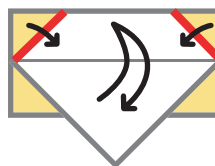

3. Turn the square over and fold each corner in to meet at the center. The result will look like the square on the right.

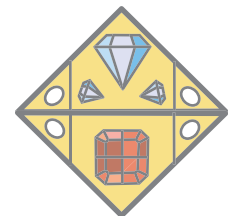

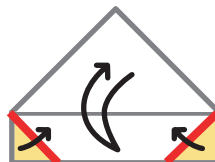

4. Turn over again, making sure the "diamond" section is at the top. Fold the top and bottom edges to the center. The corners will pop out as shown on the right.

5. Fold down the diamond section and then fold down each of the two yellow corners. Then unfold the diamond again.

6. Repeat for the other side.

7. Gently use your fingers to pull open the crown. Pinch the corners to complete the shape.
