# Easter Basket

Instructions:

1. Print out the inside and outside of your basket, each on a separate sheet of paper.

2. Cut out your basket. Use a glue stick to stick the inside and outside together with the printed sides facing out.
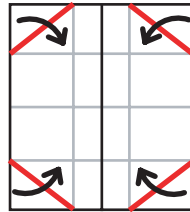

3. With the inside of your basket facing up, fold each long side in to the center line and then unfold.
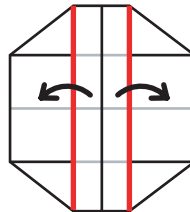

4. Next fold each short side in to the center line.

5. Now fold each corner down on the marked diagonal line.

6. Fold each of the two center strips down over the corners you just folded. Press down firmly.

7. Using your fingers, gently lift up on the strips you just folded. The sides of your basket will stand up. Pinch the corners to make the basket square.

8. Cut out the handle on this page. Fold on the lines and glue down the flaps on the underside. Use the stapler to attach each handle end to the inside of your basket.

Happy Easter!
